INTRODUCTION

Embarking on the journey of setting up a startup demands more than just ambition; it requires comprehensive understanding of a local business ecosystem, familiarity with legal and regulatory frameworks, and an awareness of sectors and the wider economic landscape of a city.

Nowhere is this truer than in the dynamic city of Dubai. With its innovative spirit, business-friendly and flexible regulatory environment, and flourishing economy, the emirate has captured the attention of entrepreneurs and investors from around the world, drawing them to its shores.

As enticing as the prospects may be, establishing a business in Dubai is not without its challenges. The intricacies of local laws, administrative procedures and navigating between different sources of information, particularly in new age sectors, can often confound even the most seasoned entrepreneurs. The city's constant evolution, with its range of jurisdictions in which to operate, can make it difficult to keep up and find the right blueprint.

In such a fast-changing environment, reliable guidance is not just beneficial but essential. It is in recognition of these challenges that the Dubai Chamber of Digital Economy has published a comprehensive guide for startups aimed at simplifying the process of setting up a business in

Dubai. Its purpose is to help aspiring entrepreneurs navigate the intricacies of Dubai's business landscape, equipping them with the information they need to make informed decisions.

This guide is more than just a mere collection of instructions. It is a testament to the city's commitment to fostering a business-friendly environment and empowering entrepreneurs with the insights they need to unlock the vast potential that Dubai has to offer. As you begin your journey of exploration into the Dubai business landscape, let this guide be your trusted companion.

Brought to you by Dubai Chamber of Digital Economy

Dubai Chamber of Digital Economy, one of three chambers operating under the umbrella of Dubai Chambers, aims to strengthen Dubai's position as a global leader in digital economy, attract specialised talent, leading companies and new investments and create a stimulating environment that supports the growth of digital companies. The Chamber capitalises on new opportunities emerging from increased digitalisation and the expansion of Fourth Industrial Revolution technology across all sectors of business.

The final step in the process of setting up your business is opening a bank account. UAE regulations do not allow you to do business through a personal account. You will need to open a corporate bank account to process financial transactions for your business.

DOCUMENTS REQUIRED TO SETUP A UAE BANK ACCOUNT

Banks will require you to undergo their know-your-customer (KYC) process when applying for an account, which can often take time. Requirements can differ based on scope of business activity and requirements of the bank. Opening a bank account has often been identified as a challenge by founders in Dubai, so in order to demonstrate trustworthiness, here is a comprehensive list of documents you can provide to strengthen your application.

› A completed application form describing what your business does, and goods and services you will be trading in

› A detailed business plan

› Examples of similar businesses or business models or case studies of successful business models that have previously been cause for similar concerns that can help the bank understand the high-risk or new-age sector better

› Research on your market segment and opportunity

› Proof of any awards or grants won at a pitch competition

› Passport and visa copies for the business owner(s), shareholders and authorized signatories

› A CV describing the owner's professional background and experience

› Proof of a local address

› Company trade license

› Company memorandum and articles of association

› A valid trade name reservation certificate issued by the Department of Economic Development (DED)

› List of the names of at least five suppliers and five customers

› Disclosure of the source of funds

› Rent agreement for the commercial space where the business will be located (if applicable)

› A valid health card and Emirates ID for the business owner(s) and any partners

› Minimum of three months' bank statements of business owners

› Certificate of share capital deposit

لتنمية المشاريع الصغيرة والمتوسطة
DUBAI SME

STARTUP-FRIENDLY BANKS

Every bank has a target market. Banks decide whether you fit their customer criteria based on your area of business, turnover and product usage. International banks in the UAE typically do not have a proposition for smaller companies with annual turnover of less

than AED 50 million or limited number foreign exchange and trade transactions, and cash management business. On the other hand, some regional and local banks in UAE offer more startup-friendly propositions, including:

بنك أبوظبي التجاري
ADCB

بنك الإمارات دبي الوطني
Emirates NBD

mashreq
neo biz

بنك دبي التجاري
Commercial Bank of Dubai

Wio

RAK BANK
Simply Better

مصرف الإمارات للتنمية
Emirates Development Bank

بنك دبي الإسلامي
Dubai Islamic Bank

Global neo banks

Some tech startups in the UAE with global customers prefer to bank in USD and use global neobanks like:

truly
financial

MERCURY

FACTORS TO CONSIDER WHEN DECIDING WHICH BANK TO OPEN YOUR ACCOUNT WITH

- › What is the minimum balance required?
- › In what instances you might you need to pay fees and penalties
- › What online facilities does the bank offer?
- › What corporate card facilities does the bank offer?
- › How many withdrawals can you make each month?
- › What fees apply to new checkbooks and debit or ATM cards?
- › Do you need to transfer money overseas? If so, where to, and how long do transactions take to target countries?
- › Do your potential clients or competitors bank with them?
- › In what instances can the bank freeze your account

Note: You cannot open a business banking account without establishing a company. Banks in the UAE do not charge money to open a business bank account

LEGAL STRUCTURES

There are three company setup options available when setting up a business in Dubai:

Mainland companies are incorporated onshore entities, licensed by the Department of Economic Development (DED). You are free to incorporate a mainland company anywhere in the UAE and can conduct businesses within and outside the local market.

Free zone companies are entities incorporated within special economic zones that are self-regulated by the managing

authorities. Free zone entities can only conduct business and trade with the local UAE market with the assistance of a local service agent. Unlike mainland companies, free zone entities can only conduct business and trade with the local UAE market with the assistance of a local service agent.

Offshore companies in the UAE are entities that operates outside of its country of origin. Companies choose to establish an offshore setup to take advantage of Dubai's numerous business incentives including the exemption from taxes. They are often used for investments, financial transactions, and asset protection.

VISAS FOR ENTREPRENEURS AND INVESTORS

Living and working in the UAE requires a visa, which can be for 2, 3, 5, or 10 years based on eligibility.

GOLDEN VISA

The Golden Visa offers 10 years of renewable residency for entrepreneurs, scientists, inventors skilled professionals, humanitarian pioneers, and investors, without the need for a sponsor. Entrepreneurs must own a startup with locally invested capital of AED 2,000,000 (\$545,000). To view detailed criteria and apply click here.

GREEN VISA

A Green Visa offers 5 years renewable residency to freelancers and self-employed professionals without the need for a sponsor. Entrepreneurs must own a startup with locally invested capital of AED 1,000,000 (\$272,000). To apply, click here.

INVESTOR VISA

This type of visa provides entrepreneurs starting a business in Dubai in any of its free zones with renewable residency for 3 years in any free zone across the UAE.

EVENTS & CONFERENCES

* As packages across freezones vary, in addition to license costs you may need to budget for additional costs where applicable and not inclusive such as data protection fees ~AED 2,000, establishment card ~AED 1,500 and other one-time setup fees ~AED 2,000.

Note: Regulations and requirements may vary across different free zones in Dubai, so it's important to thoroughly research and understand the specific rules and regulations of each free zone before setting up your FinTech startup. It's also recommended to seek professional advice from legal and financial experts to ensure compliance with local laws and regulations. Investors will need to consider which legal form is most appropriate for their business and the types of commercial activities that they intend to conduct. Dubai is a rapidly advancing economy and this document serves only as a snapshot of the continually evolving wider ecosystem.

stripe

www.stripe.com

Founded in **2010**

\$817 billion

in payments processed by businesses on Stripe in 2022

The Silicon Valley unicorn opened its **Middle East headquarters in Dubai** in 2021 to tap into the region's booming digital economy.

Stripe is a technology company that builds economic infrastructure for the internet. Businesses of every size—from new startups to public companies—use its software to accept payments and manage their businesses online. Stripe makes money by taking a percentage and a fixed fee on each payment it processes.

Operating in **130 countries**

1.14 million websites use Stripe to accept payments

As of January 2023, Stripe was valued at

\$95 billion

Stripe is reportedly the **most valuable private company ever to come out of Silicon Valley** after its valuation nearly tripled in less than a year. It is worth more than both Uber and Facebook were before they went public.

MISSION

“To increase the GDP of the internet.”

Stripe has raised a total of

\$2.235 billion

in disclosed funding across 12 rounds, including \$600 million in its latest funding round, announced in March 2021

“The UAE is a thriving hub for technology, supported by strong investor appetite, internet-savvy consumers, and an open, innovative ecosystem of business leaders and entrepreneurs. Similarly, the pool of tech talent in the Middle East is growing very rapidly. However, companies still face challenges when trying to accept payments, make payouts, and manage the financial side of internet businesses. Stripe removes these complexities so businesses can focus on what makes them special. Our launch today also means we can now connect our global user base to the Gulf, enabling them to seamlessly expand their operations in the region.”

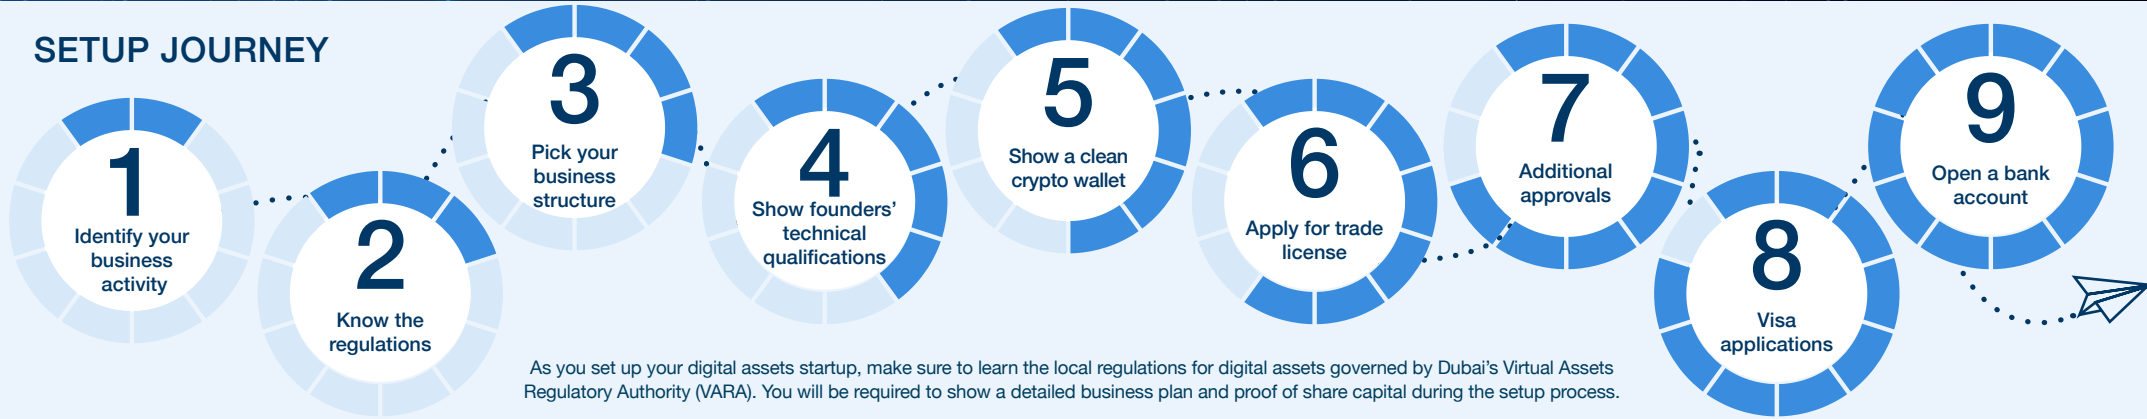

- **Matt Henderson, Europe Middle East and Africa (EMEA) Business Lead at Stripe**

Tesla founder Elon Musk and billionaire investor Peter Thiel were early investors in Stripe.

SETUP JOURNEY

As you set up your digital assets startup, make sure to learn the local regulations for digital assets governed by Dubai's Virtual Assets Regulatory Authority (VARA). You will be required to show a detailed business plan and proof of share capital during the setup process.

OVERSEEING THE DIGITAL ASSETS SECTORS IN DUBAI

EVENTS & CONFERENCES

** Any firm seeking to carry on Virtual Asset Activities in or from Dubai (excluding DIFC, which would require a DIFC Innovation License) must apply for a VARA License prior to commencing operations. Applying for a VARA License is completed in two stages; First, application for initial approval to establish a legal entity and to commence operational setup, then an application for the Virtual Asset Service Provider (VASP) License Application. To file an application for a license, you must prepare documents for a chosen virtual asset activity and you pay an application fee, from AED 40,000 to AED 100,000. Payment does not guarantee a license. You also need to compensate for supervision, from AED 80,000 to 200,000 annually. Licensing is complex. It incorporates 4 levels: Minimum Viable Product (MVP) Provisional; MVP Preparatory; MVP Operational; Full Market Product (FMP) Operational. Timeframes can range between 4 weeks to several months at the regulator's discretion.

* As packages across freezones vary, in addition to license costs you may need to budget for additional costs where applicable and not inclusive such as data protection fees ~AED 2,000, establishment card ~AED 1,500 and other one-time setup fees ~AED 2,000.

Note: Regulations and requirements may vary across different free zones in Dubai, so it's important to thoroughly research and understand the specific rules and regulations of each free zone before setting up your digital assets startup. It's also recommended to seek professional advice from legal experts to ensure compliance with local laws and regulations. Investors will need to consider which legal form is most appropriate for their business and the types of commercial activities that they intend to conduct.

BYBIT

www.bybit.com

Founded in 2018

Opened global headquarters
in Dubai in 2023

MISSION

“Unleashing the full potential of crypto believers seeking to level up via Web3 with next-generation tools, support, and opportunities.”

Bybit is the **world's third most visited crypto exchange**, and the second largest crypto exchange in the Middle East and North Africa (MENA). Operates in 160 countries and in 16+ languages.

15 million users

worldwide

ByBit's daily trading volume surpassed

\$4 billion

in 2020.

“We are excited to be part of Dubai's futuristic skyline and most importantly, to be able to officially call Dubai home. The digital economy is advancing at incredible speed and crypto and blockchain technology will be the mainstay and the connective tissues. As one of the most progressive digital assets hubs in Middle East and North Africa (MENA) and the world, Dubai is optimally positioned to capture the opportunities in the sector by bringing together state-of-the-art tech and infrastructure, international talent and vision. The new office will be an innovative hub for dreamers and creators to exchange ideas and unlock next level opportunities of Web3.”

- Ben Zhou, CEO and co-founder of Bybit

> 270 Assets

> 200 Contracts

Perpetual & Quarterly Futures

Bybit was granted a Minimum Viable Product (MVP) Preparatory Licence by Dubai's Virtual Assets Regulatory Authority (VARA) in 2023. This follows the Provisional Licence it received in 2022.

MAIN REGULATORS OVERSEEING THE METAVERSE AND WEB3 SECTORS IN DUBAI

EVENTS & CONFERENCES

A Metaverse Service Provider license is also required for startups involved in the hosting and development of virtual environments, and is available through government authorities including Dubai Economy and Tourism (DET), Dubai Silicon Oasis Authority (DSOA), Dubai Multi Commodities Center (DMCC) and the Dubai AI and Web 3.0 Campus via the Dubai International Financial Centre (DIFC). To acquire a metaverse license and begin a metaverse business in Dubai, the following actions must be taken: Creating a 3D universe for the brand; creating metaverse on the website; publishing some other metaverse applications on the metaverse site; and then applying to register for a metaverse license. This license doesn't allow for crypto asset trading or the creation and issue of exchange-tradable tokens. The total cost of a Metaverse Services license varies from AED 15,999 to AED 27,000 based on the type of business that the provider wants to establish in the metaverse, as well as the service or goods to be offered.

* As packages across freezones vary, in addition to license costs you may need to budget for additional costs where applicable and not inclusive such as data protection fees ~AED 2,000, establishment card ~AED 1,500 and other one-time setup fees ~AED 2,000.

Note: Regulations and requirements may vary across different free zones in Dubai, so it's important to thoroughly research and understand the specific rules and regulations of each free zone before setting up your metaverse startup. It's also recommended to seek professional advice from legal experts to ensure compliance with local laws and regulations. Investors will need to consider which legal form is most appropriate for their business and the types of commercial activities that they intend to conduct.

EVERDOME everdome.io

Founded in 2021

MISSION

“Creating the most hyper-realistic metaverse.”

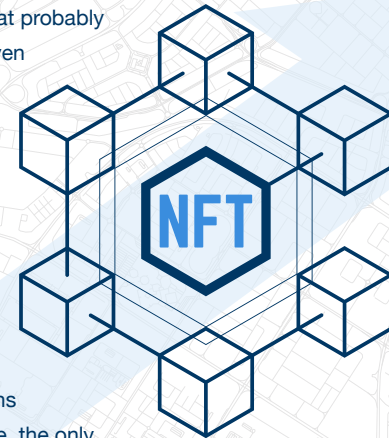

WINNER

Metaverse Innovation Award at Future Innovation Summit 2022

Everdome is a metaverse company that allows users to purchase, rent and lease property in virtual worlds. The company has built a **high-fidelity Mars and space exploration-themed metaverse environment**, bringing together individuals, creators, brands and businesses to collaborate on immersive and shared digital adventures. Users can engage in professional activities, socializing and branding their business through VR games and AR features, enabling users to interconnect digital and physical worlds. Monetization comes from B2B, B2C and P2P streams.

“We’re innovating solutions to problems that probably didn’t exist one year, one month, maybe even one hour ago. Our 3D avatars and virtual objects, such as NFTs, can be used across a vast range of platforms from medical and art to social media, fashion, and, of course, gaming. We’ve had a phenomenal response to the plots of land released so far, as each hexagonal plot of land can be developed however the owner wishes. It’s very much like investing in land in the real world, only without any of the limitations you could potentially face. In the metaverse, the only limitations are the ones we impose, so things like access to materials, or even gravity itself, don’t have to be taken into consideration.”

- Robert Gryn, Founder And CEO, Metahero And Everdome

Everdome says it has built a community of

500,000+

supporters, with circa

90,000+

unique wallets holding \$DOME, its utility token.

In 2023, Bahamas-based digital asset investment firm GEM Digital Limited increased its investment in Everdome from \$10 million to

\$60 million

Everdome is harnessing the power and flexibility of Unreal Engine 5 as its design environment for prototyping and initial designs for in-experience locations. Used widely across high-fidelity gaming, or film and TV releases such as The Mandalorian or Westworld, Unreal Engine 5 provides power previously unavailable to all but the largest development teams.

Everdome is launching a Metaverse-as-a-Service (MaaS) platform to simplify metaverse use.

SETUP JOURNEY

As you set up your AI, make sure to learn about local regulations for and-money laundering, data security standards, Know Your Customer (KYC) and custody. You may also be asked to show a detailed business plan and proof of share capital (where applicable) during the setup process.

>spiderSilk;

www.spidersilk.com

Founded in 2019

MISSION

“To protect human beings from the impact of cyber threats.”

Operates globally

spiderSilk is a VC-backed cybersecurity technology firm, specializing in attack surface management (ASM) and threat detection. The company’s proprietary platform helps organizations identify, manage and protect their attack surfaces.

spiderSilk’s proprietary technology scans the open internet on a continuous basis- that’s **4.3 billion**

internet protocol addresses, which allows companies to build a full understanding of their technology ecosystem, and how they can be compromised.

spiderSilk aised

\$2.25 million

in a pre-Series A round in 2021.

The company also raised a \$500,000 seed in 2020.

“We are the first cybersecurity technology company from the region with such global aspirations, and we are thrilled by the support we’ve received from all our partners and investors. There is a common misconception about the Middle East and North Africa (MENA) region’s ability to develop engineering-centric, deeptech solutions, especially in the cybersecurity space where most of the technology is imported from abroad. We are excited to be part of a growing narrative that is changing that.”

- Rami El Malak, co-founder at spiderSilk

Part of the

مندوق محمد بن راشد للإبتكار
MOHAMMED BIN RASHID
INNOVATION FUND
INNOVATE THE WORLD

accelerator program

SpiderSilk has discovered some of the biggest data breaches:

Blind, the allegedly anonymous social network that exposed private complaints by Silicon Valley employees; a massive spill of unencrypted customer card numbers at now-defunct MoviePass; and a lab leaked highly sensitive Samsung source code.

spiderSilk says it has discovered threats that would have potentially affected over

120 million individuals globally

SETUP JOURNEY

www.zoho.com

Founded in 1996

MISSION

“To provide software and services to help businesses excel in their work.”

Zoho is an India-born global software-as-a-service (SaaS) company that offers a comprehensive suite of business, communication, productivity, and collaboration applications, including CRM, email, office suite, project management, invoicing, email marketing and social media management.

Zoho's operations in the UAE have grown

10x over the last five years.

The global tech firm's UAE revenues were

up **45%** in 2022, which made it the **second-highest growing market**

for the company globally for the year.

In 2023, Zoho committed

\$27.2 million

in investment for expansion in the UAE, which will go toward local hiring, growing its partner network, adding Arabic support to its products, and integrating with local payment gateways to adapt solutions for the local market.

Zoho has

100 million+

users around the world across hundreds of thousands of companies.

Since 2020, Zoho has steered more than

3,500 small

businesses in the UAE into its cloud.

Zoho surpassed **\$1 billion** in annual revenue in 2022; the bootstrapped company has never raised external capital.

“Dubai is one of the most happening cities in the world today. It's a beautiful city, but I also see the mirror image of the rural areas of places I live in. These two are not separate. We cannot just draw everyone from rural areas into giant cities. It won't work for either side. Just the cost of real estate in Dubai is sky-high, which means that we have to find a balance where cities thrive and rural areas thrive. That integration is very important. These are the things that startups and the tech world aren't thinking about.”

- Sridhar Vembu, co-founder and CEO of Zoho Corporation

Zoho's growth in the UAE has also been accelerated by its partnership with the Dubai Department of Economy and Tourism to make enterprise technology available to businesses of all sizes.

InstaPract www.instaPract.ae

Founded in 2019

MISSION

“Always think ahead.”

Privately funded,
operates globally

InstaPract’s collaboration with hospital partners in the UAE came about through applying to Dubai Chambers **Market Access program and their facilitated introductions.**

InstaPract is a white-label patient health record and telehealth platform, while allows practices, clinics, insurance firms, sports organizations and telecommunications providers to offer Health Insurance Portability and Accountability Act of 1996 (HIPAA)-compliant video consultations online with payment integration using web, Android or IOS devices. The platform is compliant with international standards for transfer of clinical and administrative data between software applications including Health Level Seven (HL7v2) and Fast Healthcare Interoperability Resources (FHIR) to ensure interoperability of health information.

“Telemedicine or telehealth has existed for some time but people were not aware of its importance or its benefits. It was a buzz word or a feather in the cap to the providers or hospitals offering the service. However, in recent years there has been a gradual shift in its favor. Patients are now pushing the clinics and hospitals for virtual visits. The visionaries who were earlier not convinced on the success of this model, or that telehealth can bring return on investment, are now beginning to realize that without such digital platforms, clinics can go out of business in present circumstances.”

Sinterex

www.sinterex.com

Founded in **2016**

MISSION

"We make it where you need it."

Sinterex uses 3D printing technology to produce mission critical parts that could take weeks to arrive in the country, **solving the challenge of localization of manufacturing capacity** across a spectrum of sectors including **dental, medical**, as well as the **oil and gas** industries.

Experts from the Dubai Health Authority's Primary Healthcare Centre and Rashid Hospital collaborated with Sinterex to save the jaw of a patient with an aggressive tumor. Given the aesthetic implications and complexity of the case, it was critical to use digital planning and 3D printing to create a patient-specific solution.

Winner, Best Pitch Award

Mohammed bin Rashid Innovation Fund (MBRIF), Innovation Accelerator, Cohort 5 2023

Sinterex has raised **\$2 million** from angel investors in Dubai. Sinterex also closed a non-equity assistance round from MBRIF.

Sinterex is the **first company to commercially deploy metal 3D printing technology** in the UAE, as well as the first to design and manufacture a patient-specific implant and operate a Point-of-Care Hospital 3D printing facility.

96% of Sinterex's customers have placed repeat orders

"Dubai is a great place to get started; the challenge is to build success. The emirate itself is still small in population terms -about the size of a large city in Europe, or a medium-sized city in the US- which can limit growth potential. It is also ferociously competitive, and it attracts businesses from around the world. However, if you can make it work in Dubai, then you have a great chance of expanding across the region."

- **Julian Callanan, founder and CEO of Sinterex**

Winner, Best 3D-Printed Healthcare Products Manufacturer

MISSION

“To increase accessibility to affordable quality education for Arabic speaking communities, and serve 10 million learners in the Middle East and North Africa.”

almentor is an online video learning platform in **Arabic** and English that offers free crash courses and paid full tracks for both organizations and individuals on different topics including entrepreneurship, soft skills, parental and relationship management, sales and marketing, business management, humanities, health and fitness, and technology.

almentor has introduced **the first Arabic course on Climate Change and Sustainability** in the Middle East, led by

Dr. Mahmoud Mohield in the UN

Special Envoy on

Financing the 2030

Agenda and UN

Climate Change

High-Level

Champion for Egypt.

In 2023, almentor raised

\$10 million

in growth capital in a pre-series C round led by e& capital, the tech investment arm of e&. The proceeds will be used to accelerate almentor's growth towards its goal of serving 10 million learners in the MENA region. e& capital joins existing investors Partech, Sawari Ventures, Egypt Ventures, Sango Capital and Endure Capital.

“We are now leading the continuous video learning industry in the Arab region, and we have a responsibility that goes beyond our ambitions for Almentor Company. Our responsibility now is to work unceasingly to improve the industry as a whole in the Arab region, and this can only be achieved through gaining the confidence of the Arab learners in the value, professionalism, and impartiality of the content provided by the platform, and working in line with the global learning trends.”

- **Dr. Ihab Fikry, co-founder and CEO of almentor**

Almentor has worked with more than 950 mentors to create over **1,000** online courses for individuals, corporations, and government entities.
